

DIMERCO SERVICE

Factory Relocation to
Southeast Asia and India

CHINA>SE ASIA

FACTORY RELOCATION

Help foreign companies relocate production to Southeast Asia by leveraging local expertise, maximizing government incentives, and ensuring smooth customs compliance.

What Companies Would Benefit Most?

Companies looking to diversify their factory to emerging markets (Southeast Asia and India) to mitigate supply chain risks while capitalizing on incentives offered by emerging markets.

Industries

Semiconductor, Electronics, Automotive, Textile

Triggers for Service

- Companies expanding under China+ strategy to diversify production locations and reduce risk
- Shift to more “tariff-friendly” countries
- Emerging market incentives to expand into their country

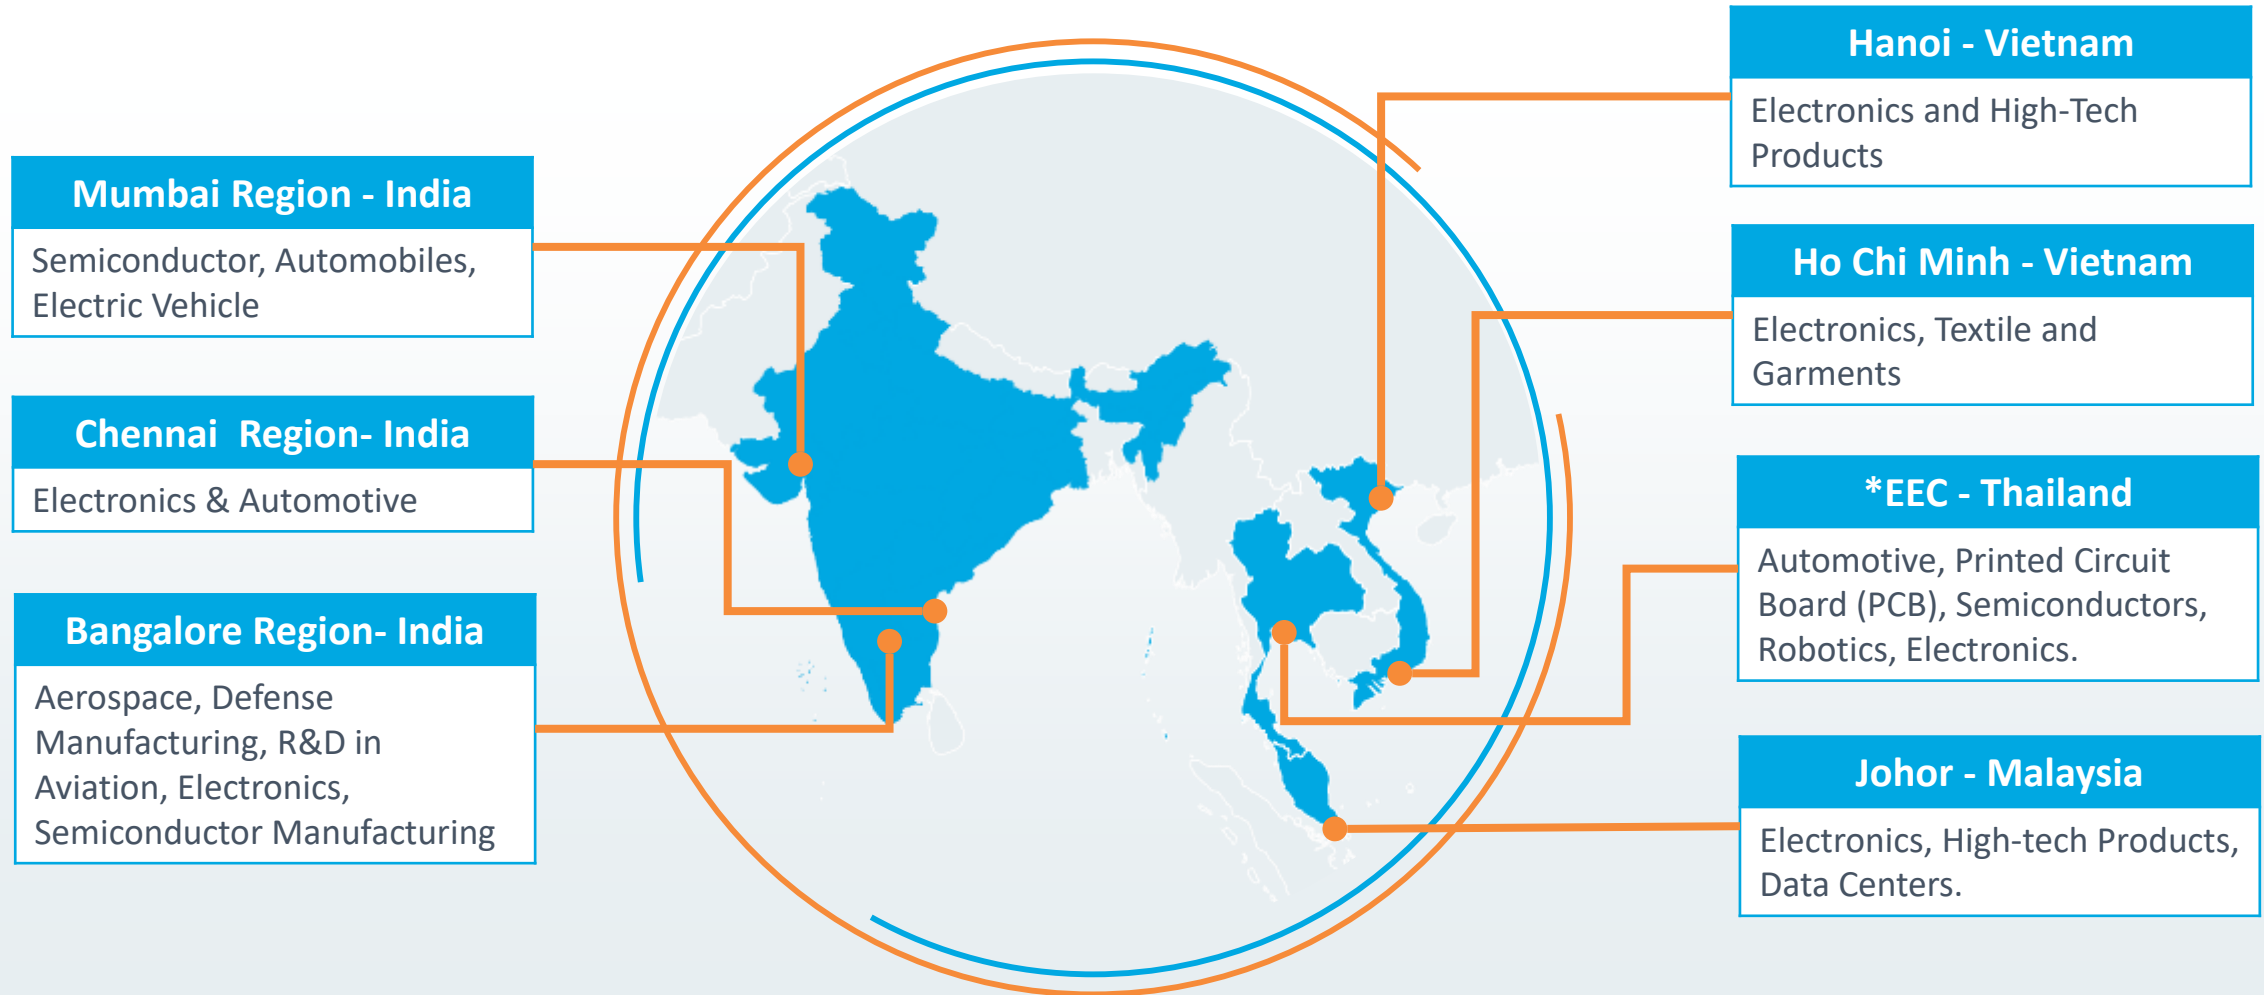

WHY PARTNER WITH DIMERCO?

Dimerco operates in just about every major market across Southeast Asia and India and uses that local logistics know-how to provide sound, practical recommendations based on real-world expertise.

FEATURES AND BENEFITS

CHINA>SE ASIA
FACTORY RELOCATION

Feature

Experience in establishing operations in new market – legal entity, required licensing, regulatory requirements, etc.

Knowledge of customs regulations – not just the “black & white” rules, but the other areas only experienced operators would know.

Multi-lingual local teams – English, Mandarin, and local languages.

One-stop provider of integrated services – Knowledge of local air/ocean operations and customs brokerage and how these impact factory relocation.

Benefit

- More accurate picture of how to do business in different markets
- More accurate assessment based on real-world insight. This is essential for complex compliance such as getting certificate of origin and importing used machinery
- Ensure seamless communication, facilitating smoother market entry and operations.
- Recommendation reflects broad understanding of all key factors. Single-source logistics solution easier to manage.

CASE STUDY

FACTORY RELOCATION

Since 2019, Dimerco Vietnam has helped many companies successfully relocate manufacturing from China to Vietnam, providing guidance on import requirements, customs compliance, and logistics.

Advise on complex import regulations for used machinery and equipment.

Recommend strategies to minimize import duties and maximize tax and VAT savings.

Provide experience-based guidance on customs compliance for imports.
